THE HISTORY OF THE UNITED STATES

OF THE
NORTH AMERICAN CONTINENT
FROM THE FIRST DISCOVERY
TO THE PRESENT TIME

BOOK I

The first discovery of the North American continent was made by Christopher Columbus in 1492. He sailed from Spain in search of a westward route to the Indies, and after a long and perilous voyage, he landed on the island of San Salvador in the Bahamas. This discovery opened up a new world of exploration and settlement for the European powers.

BOOK II

The second book of the history of the United States covers the period from the first settlement of the colonies to the outbreak of the American Revolution. It details the struggles of the colonists against British rule, the growth of the colonies, and the eventual declaration of independence in 1776.

BOOK III

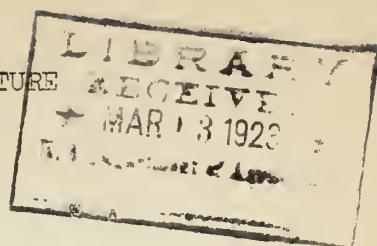

The third book of the history of the United States covers the period from the end of the American Revolution to the outbreak of the Civil War. It details the early years of the new nation, the growth of the federal government, and the tensions that led to the Civil War in 1861.

The fourth book of the history of the United States covers the period from the end of the Civil War to the present time. It details the Reconstruction era, the growth of the industrial revolution, and the challenges of the modern world.
